

# Year 5 Summer Term

We hope you have all had a fantastic Easter break and are looking forward to the Summer Term.

## Subjects & The Curriculum

This term in English lessons, we are learning about persuasive letter writing and poetry. In Maths, we will be learning about Statistics, Shape and Measure, and Decimals. Our History topic is 'Ancient Greece', and we will be looking at how this civilisation lived and the influence they had on our world today. Our focus in Science is Plants and Life Cycles and then Animals, including Humans. To support this topic, project homework will be sent by email.

### Must haves:

- **Healthy snack** for break time (fruit)
- Water bottle
- Book bag with reading book (everyday)
- Jumper or cardigan
- Glasses — if needed
- Swimming kits for the first half of the Summer Term .

**MUST HAVE**

5F - swim on a Tuesday      5H - swim on a Friday

### Homework

As usual, children have one week to complete their homework. Homework consists of Reading, Maths and Spellings.

**Reading:** Pupils need to read the pages set for them by the teacher. They must complete the task set in their yellow book. It is really useful, if you comment in their yellow book review, so we know how they are getting on with their reading at home.

**Maths:** All children are familiar with using 'Times Tables Rock Stars' which they can log into and practise their multiplication and division facts.

MyMaths homework can always be accessed and tasks on here will continue to be set weekly (look out for the secret codes each Friday).

Spellings are set each Friday and they can be found on Teams.

### Important date for Year 5 pupils:

- On Thursday 23rd April, the children will be taking part in a theatre workshop. This Expert Led Workshop will enhance children's unit on Musical Theatre as part of the music curriculum and will provide children with singing and performance skills

Thank you for your support!

**Mr Feely, Mr Hedderley, Mrs Fox and Mrs Beedon**
